Prince was a well-known, popular musician and sex symbol, yet also popular for his freedom of speech. Some conspiracy theorists believe that Prince's controversial speeches about chemtrails may have led to his sudden, unexplained death.

Prince was a hardcore conspiracy theorist who believed that commercial aircraft exposed the world to harmful chemicals that causes harmful effects to people mentally, physically, and emotionally, *Vocative* reports.

Prince sang about chemtrails in his 2003 album song, "Dreamer." While Prince was speaking during an interview on the *Tavis Smiley Show*, he revealed that his inspiration to write that song was from Dick Gregory, a civil rights activist.

"Gregory said something that really hit home about this phenomenon of chemtrails. And you know, when I was a kid I used to see these trails in the sky all the time and 'Oh that's cool—a jet just went over.' And then you started to see whole bunch of them and next thing you know everybody in your neighborhood was fighting and arguing and you didn't know why."

Prince was a healthy vegan who took care of himself. Shortly after he announced that he had the flu, he passed away suddenly in his Paisley Park, Minnesota, home.

Was it the chemtrail flu that took Prince's life? What exactly is the chemtrail theory? Back in the early 1990s, people started to wonder if the contrails that follow planes were actually chemtrails. Chemtrails are known to be chemicals exposed in the air to pollute the world in order to change the atmosphere and slow down global warming. *Gizmodo* reports that some people claim to become sick after seeing chemtrails.

Contrails typically fade away within minutes, whereas chemtrails tend to linger for long periods of time, according to *Chemtrails 911*.

[Photo by Scott Olson/Getty Images] Prince was a very active speaker in regards to chemtrails. He often became involved with conspiracy threads and even spoke about chemtrails openly on television. Prince has multiple songs that refer to the chemtrail conspiracy.

It was recently revealed that Prince had posted a picture on Instagram last week that captioned a cryptic message, “JUST WHEN YOU THOUGHT YOU WERE SAFE...”. You can see the original Instagram post [here](#), but the caption has since been deleted! Conspiracy theorists believe that this may be a warning to all of us from Prince, himself.

Although this “warning” may not mean a thing to most people, Prince has been known for his scary, accurate predictions. In 1998, Prince sang a song predicting the 9/11 attack. His lyrics are as follows.

“I’ve got to go back to America, I’ve got to get ready for the bomb, Osama bin Laden getting ready to bomb, America you better watch out, Osama bin Laden getting ready to bomb, 2001 hit me.”

See the live video of Prince talking about chemtrails and his “Dreamer” lyrics on the *Tavis Smiley Show*.

Although it is probable that the flu took Prince’s life, it is certainly a possibility that Prince was getting too close to exposing the world to the government’s chemtrail conspiracy.

Merle Haggard is also among the dead, who before dying, sang a song mentioning chemtrails. Merle Haggard sang the song, “When I Hate.”

“What I hate is seeing the chemtrails is in a clear blue sky today. Thought it to be cool that someone I really like makes mention of what is really going on in our skies.”

Conspiracy theorists are certainly eating this up, and do believe that Prince and Merle Haggard were, indeed, murdered because of their involvement in exposing the chemtrail conspiracy,

What are your thoughts on Prince's death? Do you believe that he died from natural causes, or do you think Prince, the conspiracy theorist, died as a result of a chemtrail conspiracy involvement?

This story is still developing, as autopsy results have not been released.
